Profile

Experienced Graphic Designer and Project Manager seeking new opportunities in full stack software and web development. Have spent the last few years specialising in wide format printing and signage but enjoy coding and the problem solving that comes along side so much that I'm seeking to pursue it as a full time career.

Projects

ZAPP (Zombie Apocalypse planning poker)

Terminal app that features a game familiar to those in the programming world "planning poker" or "scrum poker" based around the zombie apocalypse.

- Programming languages: python, bash scripting
- Development IDE: Visual Studio Code

[Github - github.com/JamJuiceCreative/T1A3--Terminal Application](https://github.com/JamJuiceCreative/T1A3--Terminal Application)

WRAPI (Wildlife Rescue API)

API to give those interested in wildlife conservation a platform to communicate with one another as well as establishing their own rescue organisation.

- Server side programming: python, SQL
- Back-end framework: flask
- Database: Postgres
- Client applications: Postman, Insomnia, Dbeaver
- Development IDE: Visual Studio Code

Translator PU

Translator PU is a front-end for the LibreTranslate API. User interface features drop-down menus for language selection and text-boxes for input and output text.

- Front end technologies: HTML, CSS, Bootstrap
- Front end framework: React
- Server side programming: Java Script
- Development IDE: Visual Studio Code
- Deployment platform: Netlify
